Republic of the Philippines NATIONAL PRIVACY COMMISSION

TECHNICAL SPECIFICATION

PRIVATE AUTOMATIC BRANCH EXCHANGE (PABX) SYSTEM WITH IP PHONES/HANDSET (APP Item No. 2022 - 0117)

I. BACKGROUND

The current PABX system of the National Privacy Commission (NPC) was installed and became operational in 2018, it is currently bundled with PLDT Telephone Subscription Services. Since its inception, the PABX system has been proven to be useful tool for NPC, however, the increasing number of users and the need for extension numbers are continuously growing in which the current system could no longer accommodate, therefore further expansion and upgrade are needed, additional justification includes the following reasons:

- 1. Limited flexibility in customization and configuration for both phone handsets and the PABX Server.
- 2. No available IP Phones and/or extension numbers allocation for new units/employees.
- 3. Limited integration with SMTP server and GSM Gateway.

II. OBJECTIVES

The objective of this procurement is to acquire our own PABX system that will allow NPC internal employees communicate both within the organization and external clients, allow a flexible system that will efficiently handle multiple landline calls simultaneously with added capability to receive mobile calls, allow softphone dialer application across the web, desktop and mobile which supports multi-channel communication features, and allow managing the PABX system easily without the third-party provider to assist in the configuration and securing the voice channel.
